Med-View Airline Clarifies EU Operational Restriction

Lagos, 19th May 2017

Med-View Airline Plc hereby clarifies the European Union operational restriction, which the public has misunderstood as a total ban on its UK operations.

The airline hereby states that its operations to London is in no way affected by the ban and has continued to operate with her wet-leased aircraft. The ban falls under exception rule in EASA, Annex A, which states that "Air carrier listed in Annex A could be permitted to exercise traffic rights by using wet-leased aircraft of an air carrier, which is not subject to an operating ban".

The Airline regrets the anxiety the misinformation may have caused its teeming passengers and investors and assure them that there is no basis for alarm as the Lagos-London flight remains unaffected.

Med-View Airline reinstates its commitment to safety, and the airline is currently working with EASA and NCAA to restore normalcy..

The Airline on Wednesday, May 17, 2017 operated its normal schedule flight to London amidst the misinformation about the restriction.

It will be recalled that in March 2016, Med-View Airline passed through one of the most stringent operations audit of the global airlines' body – the International Air Transport Association (IATA), after which it was issued with IOSA – International Operational Safety Audit.

The Airline has secured a B777 aircraft leased from an EU-member state to boost its international operations, which will soon join the fleet.

Yours faithfully,

For: **MEDVIEW AIRLINE PLC**
